ROCK'N'ROLL SOFT TOP

Exceptional stability, control and comfort

Building on the success of the original ROCK'N'ROLL board, which has a unique shape that provides excellent stability and control, we have created the ROCK'N'ROLL SOFT TOP, which is the perfect choice for discoverers of the sport, kids and schools. The concave outline offers exceptional stability and balance while on the water. The wide tail allows for easy acceleration, take-off and great control while flying. The largest sizes of the ROCK'N'ROLL SOFT TOP are equipped with a center US Box to fit a fin as an additional tool to assist beginners and prevent drifting, as well as extra-long foil boxes to allow flexible foil placement. The entire deck and rail are protected with a soft EVA pad, offering comfort when kneeling and durability in use. Experience the thrill of wing foiling and feel the joy of dancing on the water! You will be amazed at the speed of your progression.

ROCK'N'ROLL SOFT TOP 37, 67, 107, 117, 137, 167

Wing School

"Since we started using the ENSIS ROCK'N'ROLL Soft Top, teaching wing foiling has become easier. The board is very stable, perfect for any weight and riding level. With the soft top you can't hurt yourself if you fall. After a successful day of schooling I really enjoy using the board myself. It is a great all-round board."

Yo Wiebel, owner of Foiling School, Switzerland

Performance Features

Ultimate stability in the water

The wide nose and tail are engineered to provide important stability, and the volume is perfectly distributed. Both features working to support your balance on the water.

Easy acceleration and take-off

The bottom shape and rocker have been designed for effortless takeoffs. This enables you to generate speed without actively-pumping until the foil is ready for a slow and steady takeoff.

Control and high maneuverability

The compact shape and concave outline result in reduced swing weight, allowing you to control and steer the board in your desired direction while on the foil. The deck has been recessed to give all the control you need.

Smooth touchdowns

In case of a touchdown, the wide nose is kicked up to enable easy and smooth landings, making it easy to get back up on the foil.

Comfort and protection

The soft EVA padding on the deck and rails makes kneeling comfortable and falling on the board softer. In addition, the soft top provides protection for the board.

Pump-, prone-, wake- and wing-foiling

The ROCK'N'ROLL SOFT TOP 37 and 67 are the perfect partner on the water for lighter persons, kids or advanced riders. Whether wing-, pump-, prone- or wake-foiling, your sessions will be an unforgettable experience.

More Features

Center fin setup

This is the ideal set up for your first steps in discovering wing foiling. The center fin (US-Box fin not included) helps you stay upwind and on a straight line. Applies to sizes 137 and 167.

Foil position options

An extra-long foil box ensures the ideal foil position depending on your weight, riding level and the wind conditions. The small board sizes (37, 67) feature a regular foil box.

Durable fiberglass carbon construction

The fiberglass construction is reinforced with carbon layers at the nose, tail and on the standing area. All inserts and the foil box are reinforced with PVC to ensure durability of the board.

Convenient carrying

A handle on the bottom of the board allows easy carrying of the board with mounted foil.

Footstraps options

Multiple footstrap setting options for great versatility as you progress. Single straight or single diagonal front footstrap, 2 front footstraps or 3 footstraps option.

Comfortable pad with tail kicker

Grooved diamond deck pad with tail kicker for your comfort and support behind your back foot.

Accessories

The ROCK'N'ROLL SOFT TOP is offered as a board only option. All accessories may be purchased.

ROCK'N'ROLL board bag

There is a specifically designed ENSIS ROCK'N'ROLL board bag for each board size. Many practical details such as compression straps, padded shoulder strap, screw pocket and foil center zipper help you protect and carry your ENSIS board.

Foil knee leash

The ENSIS coiled knee leash has a padded velcro loop and a heavy duty swivel. At full length it measures 140 cm long.

Footstraps

ENSIS footstraps offer a comfortable fit, a memory fitting and a screw system.
