COLLECTION 2023

HOLI

# H O L I 2 0 2 3

Join the world of elements and holistic approach to life. Let us introduce the collection Nobile Kiteboarding – Holi 2023, in which the holistic attitude towards life is combined with four elements: Fire, Water, Earth and Air. Have you ever wondered how it would be to live in a colorless world?

**That's not an option : color is the answer to an achromatic life.**

## HOLI 2023

Holi is joy, curiosity, festival of color and celebration of friendship. It means being true to yourself and living in harmony with nature, from which we draw passion to our sport and to the world of elements that we cocreate. Everything merges and combines. In the holistic approach to life, the human being is an entity, transforming imbalance into harmony.

**Let us introduce our collection, and feel the world of elements, feel Holi.**

# K I T E B O A R D S

# NHP LEGENDARY SERIES

**For over 10 years we have been delivering this ultimate board model to all enthusiasts worldwide.**

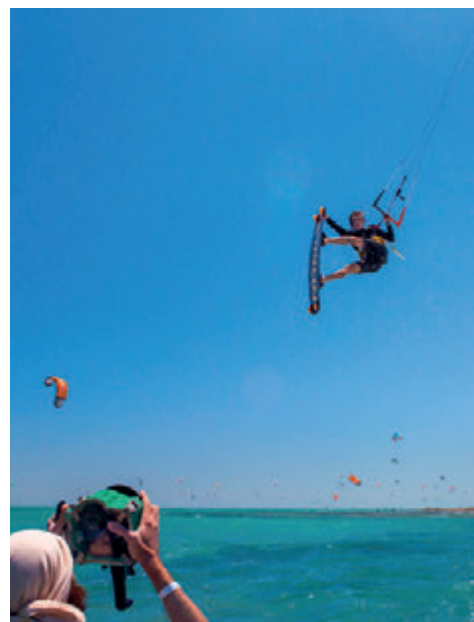

The Legendary Nobile NHP series has been produced for almost a decade now, constantly improving details as well as size range to fulfill the ever changing trends and expectations of users.

Since 2006 we have spent hours and hours on the water, which resulted in many minor but important and game changing details. Main characteristic for this model change was introducing the DAS- dynamic asymmetrical shape, which means shorter toeside edge and results in flawless and easy heelside toeside transitions

Currently the NHP Series had grown and expanded up to 6 different models to meet the expectations of even the most demanding users. Make sure you get to know the entire NHP family.

**The Sky-Blue Water and The White Air.** When you're standing at the beach, you can become overwhelmed and hypnotized by these two elements – especially when the wind is strong. The moment you step onto the water, you automatically stop thinking. Your body switches into a different mode – you are now in flow with some magnetic force driving you towards the middle of this eternal spin and movement.

If you love kitesurfing, you know exactly how it feels to suddenly become filled with passion and joy, to become one with elements. You know for sure that you live being true to yourself and in harmony with nature, once you catch the wind and waves on your board.

WHATEVER YOU ARE, BE A GOOD ONE

# NHP

**2023 NHP board is Nobile flagship model, most universal freeride board in our range.** Due to large size range it suits most users. We produce and develop next generations of this model for 10 years now and we receive positive feedback from all over the globe. NHP performs flawless in all wind and water conditions. Choppy and gusty? Give it a spin and see for yourself how well NHP performs in heavy conditions. The asymmetrical shape makes turning and switch riding easier. NHP will be your everyday favourite board.

# NHP CARBON

**2023 NHP CARBON, This is our top of the line twintip.**

Packed with technology board designed for advanced and intermediate users. Due to carbon layer this board is extremely responsive, which makes it the best machine for flat water sessions. Extra stiffness gives better pop and better edge control. NHP Carbon has great upwind performance, as well as insane pop.

W  
A  
T  
E  
R

# NHP WMN

**2023 NHP WMN is our flagship model dedicated to all Kite Chicks.** Universal freeride/ freestyle board shaped for all lighter users and girls. Very universal shape that works well in all conditions. If You're a kite Girl this is a model You must try.

# NHP SPLIT

This is the 2023 NHP Split, our best selling model in the entire range. Due to it's versatility and large size range it is the top pick from our brand. The patented 4th generation split connection allows all travel enthusiasts to pack the board in to their check in luggage and travel without any additional charge. NHP Split is a great model for all riding levels, great combination of rocker and channels on the bottom gives this board perfect upwind abilities as well as soft landings and great pop. It is a must try for all freeride and freestyle enthusiasts.

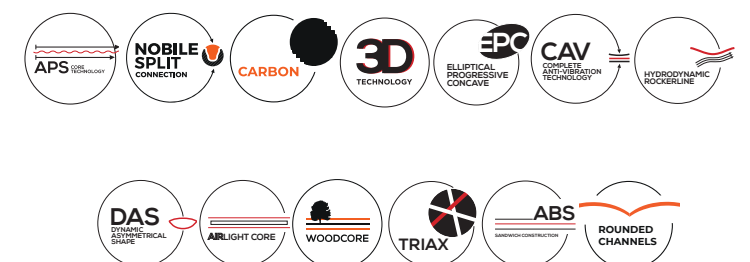

W  
A  
T  
E  
R

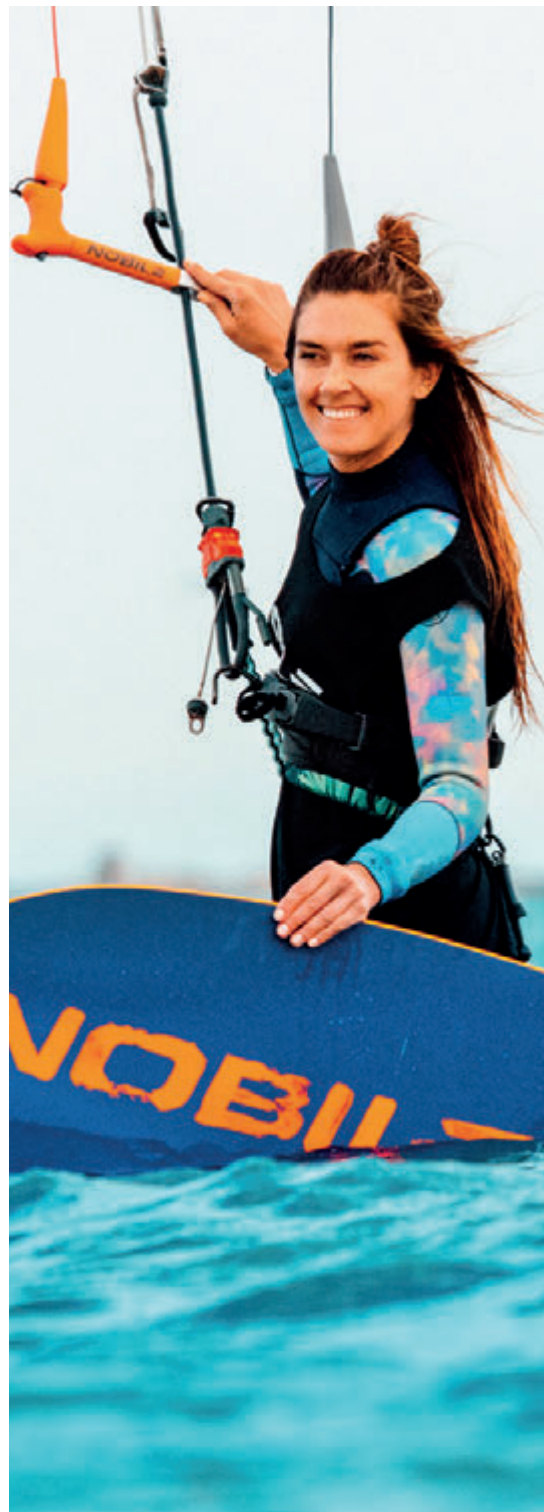

# NHP CARBON SPLIT

**This is the 2023 NHP Carbon Split - still most advanced carbon splitboard on the market.** Packed with technology like our 4th generation splitboard connection on the side with carbon layer with airlight core. Trust chanells on the tips of the board gives perfect pop and landing control. Most importantly it is a split, which means traveling all over the globe without any additional sports equipment costs. Nobile has a large group of enthusiasts due to our travel friendly policy. Make sure You check it out.

The Air – the invisible element, in the Holi collection it's the shade of white, of clouds and sky. Every rider is familiar with this feeling – when you go up above the wave and your body starts to levitate, you are quickly moving on something which is normally slipping through your fingers.

**That is what our foil series is here for.**

DOING WHAT YOU LOVE IS FREEDOM

A

NHP

SPLIT FOIL

NHP Split Foil is Nobile's unique one of a kind board. This is a unique construction that no other brand produces. If You're travel enthusiast as well as foil lover this will be a perfect pick for You. NHP Split Foil can be easily converted from regular twin tip board to a foil, which allows the user to take advantage of any wind conditions with minimum equipment required. Make sure you check it out.

R

# FISH SKIM

This is a great universal project we introduced last year. Recieved plenty of positive feedback from all over the globe. Fish Skim is a universal board that works with and without foil attached. Light wind conditions? Connect any of Nobile Foils and get going under 10 knots. Stronger wind or waves out there? Not a problem for Fish either, this board works perfect with or without straps in waves and flat water. Soft top pad gives you great control of the board any time. Meet the most universal directional out there.

A

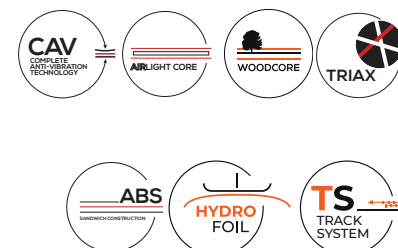

R

# POCKET FOIL

**2023 Pocket Skim Foil is our advanced foil board.**

Due to its small size it is dedicated to experienced riders. But once you're up it is an unbeatable toy that brings lots of joy and works well with various hydrofoils attached. Small size allows to pack it into check in travel bag.

**The Orange Fire – it's an internal force which draws the man in between those two elements.**

The Fire is the spirit of adventure and passion, which never goes to sleep. It pushes riders, armed only with boards and kites, to meet the depths of the sea.

LIFE IS BETTER WHEN YOU'RE KITEBOARDING

# GAME CHANGER

**WAKESTYLE board from Nobile, stepping the Game Up and going all the way with this project.**

Large rocker and deep channels make this one a straight wakestyle toy. Flat continuous rocker together with deep multi channels deliver great upwind control, which is very important once riding with boots. If You're into power moves and obstacles this will be the board You're looking for.

**And the Earth element? - It's the beach.**

A sunny, yellow shade of sand. It appears to be dry land, but constant meetings with the elements of water and air make it change all the time. It is where our adventure begins and ends. Because after some hours of surfing, it's good to have the dry land under your feet for a change...

ADVENTURE IS

THE BEST WAY TO LEARN

## NT5

**Second season we produce this lightwind/ school model.** Thanks to flatter rocker this board handles lighter winds and gives the board very easy start abilities. Due to large range of sizes 134-150cm it can suit most of the begginers, intermediate and heavy weight users. NT5 is a great choice for all weekend riders that want to make the most out of every conditions. If You're chill ride enthusiast You should give this model a try, it is always good times on our NT5

# FLYING CARPET

**2023 Flying Carpet is great Nobile low wind machine and also school gear for all begginers.**

Flying Carpet's dimensions allow it to get going in the light wind even if the user is heavier or a beginner. The size and flat rocker combined with the Wavy Channels system create less friction and make the first steps way easier. Asymetrical banana shape createss great upwind abilities.

# THE ONE V.2

For the 2023 collection we're proud to introduce a 2nd edition of Nobile well received light wind One strut Kite. We have improved the leading edge, in order to gain stiffness in stronger conditions. Lightwind abilities of THE ONE kite had been proven by multiple independent tests and users all over the globe. The one will fulfill your expectations in lightwind, foiling as well as wave riding. And still delivers proper hang time once used with straps. New colourways are extremely unique, and will let you be spotted on the beach.

## STYLE: Foil / Light Wind

### Main features:

- Innovative one strut design, excellent for light wing and foil riding
- Exceptional light wind and foil performance
- Great upwind performance and depower, combined with insane turning abilities makes this a perfect foil machine
- Great control combined with light bar feeling during all depower stages
- Superb upwind performance
- 1 strut construction vv- Easy relaunch with any kite size and wind conditions
- One pump inflation system with high volume valve
- Front and back bridle trimming options
- More durable bridles with pulleys
- Improved sewing technology and quality
- 4 line bar system
- Recommended pressure: 7,5-8,5 Psi

THE ONE ( RED) SIZE (m): 5/7/9

THE ONE ( BLUE) SIZE (m): 10/12/14

# V - R I D E

**The Nobile 2021 V-Ride is a universal freeride-wave machine. The hybrid kites are meant to be user- friendly, easy- handling and maneuverable for tight turns in waves.** The V-Ride is a great performing machine in light winds for beginners and schools, as well it keeps great performance in heavy strong wind as typically wave riding is.

**Main features:**

- Hybrid shape excellent for wave riding
- Exceptional freeride and wave performance
- Large depower range, and maneuverability needed for wave riding
- Great control combined with soft bar feeling during all depower stages | Great lift for jumps
- Superb upwind performance
- Extremely light 3 strut construction
- Tough construction and reinforced material made for wave-riding and schools
- Easy relaunch with any kite size and wind conditions
- One pump inflation system with high volume valve
- Front and back bridle trimming options
- More durable bridles with pulleys | 4 line bar system

**Size (m):**

**5/6/7,5/9/10/12/14/16**

A C C E S S O R I E S

# CONTROL STICK

**Control Stick** is a fully aluminium clean and simple bar that delivers more than enough comfort and control to every user. This product fully comply ISO 21853 standard, which is a large step forward for us. Available in three sizes: 52cm 46cm 36cm- this one comes with larger freestyle chicken loop. Most important features are two different sizes of chicken loops to deliver a right type to all kinds of riders. ROTO HUB that will help you get your lines straight after spinning one too many times. Another important feature is a smooth roller for trim line, this part will ease your de power adjustment by far.

# EZ BAR

**For the 2023 collection we're introducing a brand new Bar named EZ Bar.** It is a totally new design we introduce for 2023 to fulfill current expectations. Improved design, more durable depower system, functionall quick release and DHPS 300 lines make this bar an ultimate tool and your very best control bar. available in three sizes. Eva bar ends will take it easy on you and your gear, as well as keep the bar floating at all times. Click in chicken loop with new improved system and ISO patent will never let you down.

# ZEN HYDROFOIL

When designing our wings, we set ourselves the important goal that they should be stable, but at the same time be fast, light, durable and easy to maneuver too. With this goal in mind, we found ourselves inspired by the wings of the mesmerizing Humming-bird... The course of nature is rarely wrong. These little birds have behind them tens of thousands of years of evolution that have gradually allowed them to achieve their astonishing flight parameters, flying at speeds of up to 120km per hour, with an ability to hover in one place, and move sideways and backwards in flight. What better inspiration for our R&D department, who were inspired by the exquisite natural design of the hummingbird's wings, creating two separate hydrofoil wing lines: a standard foil with durable G10 material, and a Carbon foil with curved ends.

# SURF CARBON

The most efficient wing option for low winds, the Carbon Surf enjoys a very quick start, with insane maneuverability when up and riding, allowing you optimum fun levels even when the winds are light. Wide span and larger surface stabilizer dedicated for Carbon Surf.

Surface: 1300cm2  
Span: 75cm  
Aspect ratio: 4,3  
**CARBON SURF STABILIZER**  
Surface: 320cm2  
Span: 42cm

# CARBON RACE

The Carbon Race is a very fast wing that we recommend for experienced users only... Attach this wing and you'll know what it means to be blasting over the water on a foil! It has a relatively small surface area, and turns on a dime. Thin profile stabilizer compatible with Carbon Race Wing.

Surface: 510cm2  
Span: 64cm  
Aspect ratio: 8,0  
**CARBON FREERIDE STABILIZER**  
Surface: 220cm2  
Span: 38cm

# CARBON FREERIDE

A versatile wing for everyone, the large surface area allows for efficient water starts, fast and manageable speeds, and good all-round maneuverability, giving the rider that unique sense of freedom above the water. Universal stabilizer compatible with Carbon Freeride Wing

Surface: 800cm2  
Span: 60cm  
Aspect ratio: 4,5  
Mast: 86cm  
**CARBON FREERIDE STABILIZER**  
Surface: 230cm2  
Span: 34cm

# IFS NEXT

## UNISIZE

### 2 complete pads + set of screws and grab handle

IFS Next is a generation pad from Nobile Kiteboarding for 2023 collection. Very firm, still soft pads will make your kite session more pleasurable than ever before. Those insanely adherent straps, with advanced adjustment system in every surface, allows to firmly adjust to every foot no matter what your foot size is. There is nothing more important then feeling confident regarding the control of your board. So forget about feet falling out of foot straps, and enjoy the IFS Next.

## IFS NEXT WHITE

## IFS NEXT BLACK

# G 1 0 F I N S

**SIZE(MM): 20, 30, 40, 55** Nobile G10 fins are made of stiff glass composite which guarantees high durability. This material makes the connection between fins and the board very strong, while keeping the low flexibility of the fins. This ensures the high level of control when riding. Nobile G10 fins are compatible with the tool-free “Click&Go” mounting standard and can be used interchangeably with PA fins. The „ultra orange” colour of the fins is superbly visible from the distance, so losing your precious kiteboard in the water is impossible

# P A 3 3 F I N S

Nobile PA GF33 fins are made of 33% glass reinforced PA (Polyamide). Fins are made in extremely highly-visible „ultra orange” to let you know where did you drop your precious kiteboard. It features the same durability as G10 Epoxy but is much lighter. 33% glass reinforced PA fins become a standard in all Nobile boards.

# C H E C K   I N   B A G

**This bag is perfect for all your trips and you will find enough space for everything! The bag is compatible with all Nobile split boards and foil sets. Size: 90 x 48 x 20 (cm) | Weight: 2,35kg**

**Description:**

This bag is perfect for all your trips and you will find enough space for everything! But we created the Check Inn Bag especially for travelling with the Nobile Zen Hydrofoil, Infinity Split Foil 5'2", two kites, bars, pump, wetsuits, as well as you favourite T-shirts. You can carry it on your arm - but what for, since where are durable wheels which allow you to pull the bag behind you on wheelie around the world. The comfort and the elegance - because life is better when you are travelling!

**Technical features:**

- Secure straps on inside and cut side
- PVC coated 600D polyester
- Durable, high density protective PVC bottom with padding
- Double "tight up" straps
- Shoulder strap
- Carry handles
- Durable zip
- Puller system
- Easy handling

# LIFETIME BACKPACK MASTER TRAVEL BAG

It is a bestseller in our collection. You can pack all you need inside it to spend either a week or a month on holiday. It is very capacious and functional, with an internal pocket to safely hold your computer in a case. The backpack is also equipped with straps, so you can unfasten the skateboard, jacket, sleeping bag or even the snowboard! The backpack meets the standards of travelling on board of the low-cost airlines (e.g. Ryanair or EasyJet), as well as the regular airlines (e.g. Air France, Delta or LOT) of course.

## Technical features:

- PVC coated 600D polyester
- PVC reinforced sidewalls
- Backpack straps
- 2 neoprene carry handle
- Plastic zip
- Easy handling

Are you going to travel with your board? Make sure you have got your gear protected. Perfect bag for taking one set of kiting gear. It features a tough exterior to take as much abuse as a baggage handler can throw at it. The longest board it will hold comfortably is a 146 cm x 45 cm.

## Technical features:

- Secure straps on inside and out side
- PVC coated 600D polyester
- Air ventilation patch
- Durable, high density protective PVC bottom with padding
- PVC reinforced sidewalls
- Double “tight up” straps
- Shoulder strap
- 3 carry or pull handles
- Plastic zip
- Replaceable puller system, one spare puller
- Easy handling

# KITEBOARD

# CONSTRUCTION

# KITEBOARD

**APS CORE TECHNOLOGY**  
Nobile's patented technology that introduces the initial stress into the kiteboard construction. This Allows to independently manage the flex and torsion.

**ELLIPTICAL CONCAVE**  
Combines the advantages of both a flat-bottomed board and concave. The tail area is completely flat, whilst the centre section of the board features concave. This shape benefits from earlier planning.

**WOODCORE**  
There is no better material for a board core than wood. With its harmonious characteristic, combining strength, flex, light weight and vibration damping, wood is still the uncrowned king of core materials.

**CAV - COMPLETE ANTI-VIBRATION TECHNOLOGY**  
By using advanced core materials, laminates and variable flex zones, we managed to eliminate almost all vibrations that occur during the ride. CAV not only makes the ride smoother and faster, but also provides exceptional grip in all conditions.

**W-CONNECTION**  
Available in all Nobile Splitboards. Allows you to separate the board in half in seconds and pack it into your standard luggage together with the rest of your travel gear. Provides strong connection and offers premium durability and improved comfort. Pending Patent No. P403352.

**HYDRODYNAMIC ROCKERLINE**  
Developed after careful analysis of water movement under the kiteboard. Hydrodynamic Profile is designed to reduce water drag, optimizing the board shape directly to the water flow. The advantages over traditional rocker with a flat center are increased board speed and improved acceleration.

**ABS SANDWICH CONSTRUCTION**  
This industry standard construction provides direct power transfer to the edges and vibration damping, resulting in easy to handle and precise boards.

**DOUBLE TRUST RECTANGULAR CHANNELS**  
The technology behind the Double Trust Rectangular Channels has been worked out after profound analysis of the production stages. Their unique deep, rectangular shape ensures unprecedented grip in all directions, stability while maneuvering, and making the ride effortless at the same time. These channels allow you to use shorter fins in twintips and only two fins in wave boards. Thanks to channel-making technology, we maintained the best elements of our boards: responsiveness, flex, thin board structure and a light weight.

**TRIAx**  
This layout of fibers transfers power directly to the edges and creates perfect flex. As a result the board features aggressive filling, quick response and harmonious flexibility.

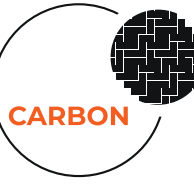

**X-REACTIVE FLEX SYSTEM**  
X layout of Carbon and Kevlar is a perfect combination. While Carbon supports rebound forces and edge grip, Kevlar reduces vibrations to minimum. Together this results in excellent pop, quick response and optimal torsion.

**AIRLIGHT CORE**  
The backbone of our tech advanced large surface boards. A blend of superlight core materials and wood, developed to reduce the overall weight of the kiteboard.

**DYNAMIC ASYMMETRICAL SHAPE**  
Designed around the Human Concept, to enhance your performance and work in harmony with your body. We have tailored the outline of the heel side rail to provide more grip, better upwind performance and maximum POP. On the weaker toe side, the curve radius is increased to improve the carving potential and comfort. At the same time DAS decreases the foot pressure necessary to hold an edge.

**CARBON**  
Carbon construction in Nobile boards gives an extra stiffness that makes the board pop and react even better than regular boards. Carbon models are the lightest constructions on the market. If you're looking for a flat water machine there is definitely nothing better than NHP carbon models. Additionally the carbon layer makes the board look futuristic and more aggressive.

**3D TECHNOLOGY**  
Developed by Nobile is still an unmatched milestone in the area of kiteboarding technology. Advanced flex management makes it extraordinarily comfortable on landings, gives it magnificent impact resistance and tons of control. 3D Technology allows more flex in selected areas of the board. As a result, the board features shorter reaction time and better response, whilst still remaining easy to ride and forgiving.

**TRACK SYSTEM**  
Nobile Track System technology is an universal foil mounting system that fits most foils on the market. 150mm long allowed to position the foil precisely where you need them to. Thanks to the Track System each user can easily set up their foil positioning according to their skills, current conditions and preferences. The Track System gives the most flexibility when it comes to foil positioning. Still it is a very durable and strong solution that will ensure a stiff mount of your foil to the Nobile board. We recommend M6 screws.

# NBL FACTORY

**Let us go on a journey to the heart of the Silesian Beskids, to our factory in Bielsko-Biała, where our ideas are converted into unique world-class products.** Here the advanced technology is combined with craftsmanship, here the innovation and tradition become one. **This is where we form our boards, this is where the collection Holi 2023 was worked out.** More than 100 individuals create the world of Nobile. We love what we do. Many of us practice sport actively. This is where we create boards that are renowned all around the world. Since 2003, when Nobile produced its first kiteboard based on sandwich technology, with a wooden core, the world of kiteboarding has radically changed. And Nobile has become expert in this technology, by its constant improvement. Thanks to the technology of layers, one of them being wooden, our engineers can design a board in such a way that it bends easily. We call this technology the Advanced Flex Engineering (AFE). Nobile is a unique brand because it combines practice and experience with an unparalleled knowledge of our experts in the fields of hydrodynamics, aerodynamics, mechanics and materials engineering.

Since the beginning, the idea behind all of Nobile innovation has been called the human concept philosophy. The essence of this approach is to understand that the most important part of using the Nobile equipment, of practicing kitesurfing, and of the thrill that it gives, lies in the human being. This means that in reality, in order to elaborate the best equipment possible, we analyze and understand natural strengths and limitations of the human body and mind. This is how we are able to build the most user friendly gear. The external aspects of the environment are of no less importance to us. The most performing and really user friendly equipment could not be created without an interdisciplinary knowledge and approach. In short, performance and safety have always been our key issues. We have never been interested in production of just some boards – we have always wanted them to be the best product on the market. The product which sets standards for safety, performance and comfort.

**The collection Holi 2023 combines innovation with respect of nature and humans. It adds some color and balance to the kiteboarding passion.**
