

BOOK
'SPLICING MODERN ROPES'

Using clear, step-by-step photography and detailed instructions, this book will guide readers through all the stages required to make strong and reliable splices. The book contains a complete range of splicing instructions.

Splicing modern ropes has quickly become the world's standard instruction book for splicing braided ropes. All techniques are covered in over 450 high-resolution photos.

The book is now available in 7 languages: English, German, French, Spanish, Italian, Dutch & Chinese

Also available in a small version which explains the most important splices. Part of the Reeds book series.

D-SPLICER

ROPE SPLICING PRODUCTS

D-SPLICER offers a range of specialized rope splicing products for sailors and riggers.

As the development of plastic fibers for ropes has taken off in the last decades, new splicing tools are required. Our pulling needles are complimentary to the conventional pushing fids. The unique double needle clamps your line and makes it easy to pull through. Especially in situations where little space is allowed and for ropes thinner than 8 mm. The needles are made from stainless steel.

ROPE FID

The rope fid is a great tool you can use while splicing rope, available in two different sizes.
Available in:
small & large

NEEDLES

Set of 6 extremely strong and sharp needles. Suitable for various diameters of whipping twine and sail repairs.

SPLICING TAPE

Special splicing tape from D-SPLICER. Strong, thin and smooth!

SEAMING PALM

Indispensable for sewing through sailcloth or thick lines. The professional palm is made of heavier materials, available for left and right handed sailors.

PH-150 POWER HOT KNIFE

The PH-150 high power hot knife heats very quickly. It is a wired 150 Watt high capacity rope cutter. The PH-150 has a large blade and is also suitable for thicker rope diameters. Each hot knife is packed individually in a carton. The standard colour is blue. This tool has an EU plug. A PH-150 with US and UK plugs are available on request.

SELMA SPLICING NEEDLES

These most commonly used splicing needles are made from highly polished stainless steel.

Available in:

Set of 4:

4mm - 5.5mm - 7.5mm - 10mm

Set of 5:

4mm - 5.5mm - 7.5mm - 10mm - 13mm

D-SPLICER

ROPE SPLICING PRODUCTS

D-POUCH

Keep your splicing tools neatly organized in the D-Pouch.
Due to the compact design it can be stored easily on board and during transport.

Available in 2 sizes:

The **P-40** for a complete set with splicing tools | 40x10x10cm

The **P-65 pro** if you use the D-SPLICER fixed professional XL series | 65x10x10cm

SPLICING SETS

D-SPLICER offers three complete splicing sets with many different tools for rope splicing.

Available in 3 sets:

Splicing set Sailor for 1-16mm ropes

P-40 Pouch | Selmaset | F-15 Fixed | C-20 Knife | Whipping twine | Needle set | Splicing tape

Splicing set Mariner for 1-16mm ropes

P-40 Pouch | Selmaset | D-Splicer set A-4 | F-20 Fixed | D-16 Scissors | Whipping twine | Needleset

Splicing tape | C-20 Knife | Rope fid small | Seaming palm RH

Splicing set Rigger for 1-20mm ropes

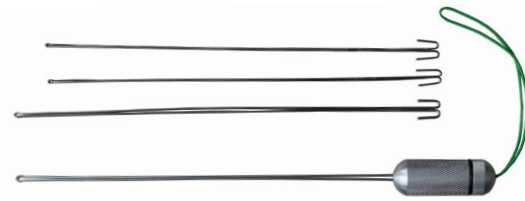

P-65 Pouch | Selmaset | F-10 | F-15 | F-20 | XL-20 | XL-25 | D-16 Scissors | Whipping twine (polyester & Stirotex)

S-4 & S-8 SoftFid | L16 D-Slack | Needle set | Splicing tape | C-24 Knife | Rope fid small & large | Seaming palm RH

D-SPLICER SET

The set contains 4 needles and a handle and comes in an sturdy tube. The needles are easy to replace in the handle.

D-SPLICER FIXED

The functionality is identical to the D-SPLICER set.
The needle has a fixed handle for easy pulling.
The needles can not be replaced.

Available in 4 sizes (1.0, 1.5, 2.0 & 2.5 mm):

F-10 up to 3mm single braided | 2 - 4mm double braided

F-15 2 - 4mm single braided | 4 - 8mm double braided

F-20 4 - 6mm single braided | 10 - 16mm double braided

F-25 6 - 8mm single braided | 16 - 20mm double braided

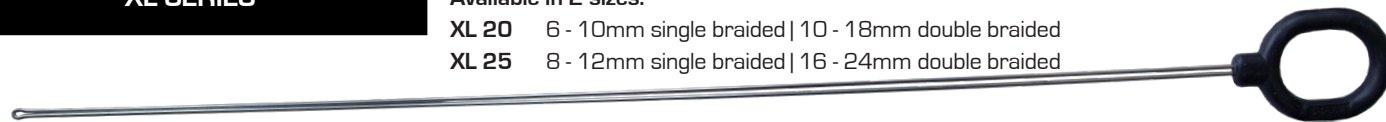

D-SPLICER FIXED XL SERIES

Professional riggers use these extra long needles (app. 50cm) all the time.

Available in 2 sizes:

XL 20 6 - 10mm single braided | 10 - 18mm double braided

XL 25 8 - 12mm single braided | 16 - 24mm double braided

D-SLACK

The D-SLACK is a durable and easy to use tool for rope splicing.
The unique construction offers good grip and it helps you getting the slack out of the rope you are splicing. Is it difficult getting the cover back and close the eyesplice?

This D-SLACK makes you work easier!

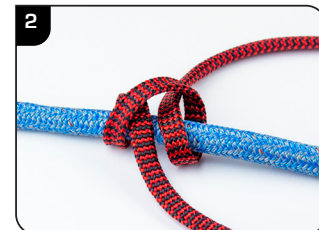

Available in 2 sizes:

L-10 for 4-10mm ropes

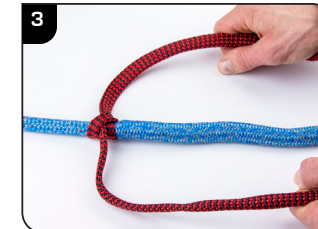

L-16 for 10-16mm ropes

The D-SLACK helps you to get the slack out of the rope you are splicing.

Take the D-SLACK and make a clove hitch around the rope you are splicing.

Close the clove hitch and start pulling all the slack towards the end of the rope or eye splice.

All the slack in the rope will now move towards one end.

Keep pulling the D-SLACK until the core has disappeared completely into the cover. Repeat steps 2-5 until you are finished.

Finish the eyesplice and untie the clove hitch.

CERAMIC KNIVES FOR CUTTING ROPES

These ceramic knives are very sharp and excellent for cutting super fibres like Dyneema® (HMPE), Vectran®, Stirotex® and Aramid. The blades remain sharp! Comes with protective cover.

Available in 2 sizes:

C-20 up to 10mm ropes

C-24 up to 20mm ropes

WHIPPING TWINE

Available in 2 materials,

Polyester waxed whipping twine

Strong coated whipping twine made from Stirotex® (HMPE)

and 2 sizes:

1mm - 35m

1.4mm - 30m

FULL RANGE OF SCISSORS FOR DYNEEMA® & STIROTEX®

Specially designed for cutting super fibres like Dyneema®, Vectran® and Stirotex®.
These are one of the hardest fabric to cut.
The blades of these scissors are laser cut and have an excellent grinding profile.

Available in 3 sizes:

D-16 up to 8mm ropes

D-20 up to 10mm ropes

D-26 up to 14mm ropes
