

User instructions compliant with Machinery Directive 2006/42/EC

ORIGINAL INSTRUCTIONS

Manufacturer:

ETS PEGUET & CIE
ZI du Mont Banc B.P. 205
12 rue des Buchillons
74105 Annemasse
France

Product description:

The user instruction refers to Maillon Rapide quick links classified as lifting accessory.

Certification & Quality:

meeting the machinery directive 2006/42/EC.
safety factor of 5 on products engraved with working load (WLL or SWL).
meeting the technical documentation issued by Péguet Maillon Rapide.

Tracability:

Each product is engraved as follows:
CE MAILLON RAPIDE
A.15 WLL 180 kg N 5
Made in France
CE mark: meeting the machinery directive 2006/42/EC.
A: supplier tracability
15: year of manufacture
WLL, kg: working load, type, diameter in mm

Type of use:

Only by competent & trained persons
Forbidden to pass under a suspended load
No exposure of personnel in the handling area.
Forbidden to use Maillon Rapide (lifting accessory) as a PPE.
During handling, avoid any dangerous maneuvers, shock.
Consider working load engraved on the Quick Link (WLL or SWL).
Quick link must be screwed to the appropriate tightening torque. No thread must be showing.
Consider the appropriate direction of loading (no strain is to be applied on the nut).

Check & maintenance:

Product check must be made by a competent person.
Quick links must be stored in a dry place.
Air-drying & lubrication of the thread is advised in case of contact with water or after cleaning with water.
A preliminary visual inspection of the following points is required before each use:
Threading
Wearing and / or abnormal corrosion (diameter reduction over 10%)
Deformation
Marking (WLL or SWL)

In case of uncertainty about safety, replace the quick link.
Product lifespan is subject to conditions of use.

Remarks:

For PPE, use exclusively PPE marked quick links (EN 362, EN 12275 standards).
